Master of Arts in Economics
Concentration in Health Economics

The core curriculum focuses on state-of-the art modelling and data analytic skills through cases and projects. Additional courses offered by the health administration and health care and policy research departments allow students to develop expertise in specific features of health care policy, institutions or health economics research.

The degree can be completed on either a full-time or part-time basis. All required economics courses are offered in the evening and the health classes meet only once a week during the day.

Prerequisites
ECON 210 Principles of Microeconomics
ECON 211 Principles of Macroeconomics
ECON 501 Introduction to Econometrics
MATH 200 Calculus with Analytic Geometry

Core Courses: 18 credits
